

Vit-E-Sel *Natural*™

VITAMIN AND MINERAL SUPPORT

A Natural Source of Vitamin E & Selenium!

Vitamin E (an antioxidant) and Selenium (a trace mineral) are essential to many functions in the horse including stress tolerance, muscle function, and more.

Horses that spend more time in a stall or dry lot are often prone to low levels of Vitamin E and Selenium. Additionally, much of the soil in North America is deficient in Selenium, causing low levels in forage.

When considering a Vitamin E and Selenium Supplement for your horse, absorption matters. Natural Vitamin E (d-alpha-tocopherol) has been shown to be more easily absorbed. Also in Select's Vit-E-Sel, we use an organic form of selenium yeast that is better absorbed, stored and utilized than other inorganic forms. Selenium plays an essential role in metabolism, supporting growth, reproduction, neutralizing free radicals, and supporting the body's normal defense mechanism against infection. Selenium is essential to muscle development, tone and function.

Features & Benefits:

- Natural Vitamin E & Organic Selenium
- More Bioavailable Than Synthetic Forms of Vitamin E & Selenium
- Helpful in the prevention of White Muscle Disease in Foals & Tying Up in Mature Horses
- Easy to Feed!
